## WELDING APRON

CODE: WR2013

### Description

Welding apron protects you and your clothes from hot sparks as you weld, cut or grind. This is a leather type of apron has double stitched seams, adjustable straps for a comfortable. This is a must for any welder's safety.

### Materials

Leather

### Application

The Climax 10 apron is ideal for providing full protection against the risk of flying molten metal or glowing particles produced during welding jobs or other work with comparable risks. The apron prevents flame propagation in case of accidental contact with flame.
